

Figure 1. The effect of the concentration of the *Agrobacterium* strain on the transformation efficiency of *Agrobacterium* strain on *Agrobacterium* strain. The figure shows the transformation efficiency of *Agrobacterium* strain on *Agrobacterium* strain. The x-axis represents the concentration of the *Agrobacterium* strain (10⁶ to 10⁹ cells/ml) and the y-axis represents the transformation efficiency (0 to 100%). The data shows that the transformation efficiency increases with the concentration of the *Agrobacterium* strain, reaching a maximum of 100% at 10⁹ cells/ml.
